Education

Santa Clara University, College of Science September 2025 - Expected May 2027
Bachelor of Science in Computer Science, minor in Mathematics

Chabot College August 2022 - May 2025

Associate Degree of Science in Computer Science and Mathematics

Awards: S-Stem Scholarship, Chabot 2024 Black Scholar

Projects and Involvement

Chabot Game-lab | Club Vice-President | Hayward, CA January 2023 - May 2025

- Led and moderated weekly club meetings and online community discussions
- Mentored incoming students in game design and programming using various engines and tools
- Contributed to game development projects by proposing design concepts and writing code for multiple game genres
- Promoted collaboration by facilitating project teams and knowledge sharing among club members

Relevant class experience: Data structures, Advanced programming,

Professional Experience

Gask Capital LLC | Office Manager | Oakland, CA August 2022 - Present

- Managed daily administrative operations for a real estate office, applying strong organizational and problem-solving skills to maintain efficient workflow
- Organized and tracked property draw schedules using Microsoft Excel and Google Sheets, ensuring accuracy and timely follow-ups
- Assisted with light bookkeeping and HR tasks, utilizing Microsoft Office tools to manage onboarding paperwork, employee records, and internal documentation

Chabot College | Student Assistant, MESA Program | Hayward, CA July 2023 - May 2025

- Explained complex mathematical and programming concepts in C++ and Python, strengthening technical communication and analytical reasoning skills
- Assisted students with debugging code and understanding core computer science concepts, reinforcing algorithmic thinking and structured problem-solving techniques
- Applied programming fundamentals to help students improve logic development and computational thinking
- Collaborated in fast-paced, team-oriented environments, demonstrating adaptability and interpersonal communication skills

Chabot College | Assistant Program Manager, MESA Summer Camp July 2023 - August 2023

- Designed and facilitated interactive game-creation lessons using Pico-8 and Roblox Studio to teach logic, creativity, and introductory programming concepts
- Applied foundational programming knowledge (Python concepts and basic game design principles) to create an engaging STEM curriculum
- Managed hardware and software troubleshooting, demonstrating technical problem-solving and systems support skills
- Encouraged collaboration and teamwork through structured group programming and design activities

Skills

- Experience in C++, Python, Pico 8, HTML, and CSS programming languages
- Proficient in Microsoft and Google Suite products
- Experience with Roblox studios, Unity, and Pico-8
